What's New In?

Hold'em Poker Calculator is a desktop application that is useful to create the Hold'em starting hands on the pre-flop and on the flop and on the river. For instance, you can calculate the best starting hand with two pair on the flop and which is the winning hand on the river. It's a good way to learn how to calculate starting hands and how to use the Flop calculator. The application helps you calculate a whole lot of hands that are important in Hold'em Poker. Description: Do you have a mind on

the poker game? Not much? Hand Evaluator is a very simple application, but very useful. Hand Evaluator provides five different values and each one of them can be adjusted and saved in a text file. To modify a hand, simply type the number you want and then click on the "Set" button. Once that is done, you can go on and see the amount of the value with which the hand is valued. You can compare two hands by clicking on the "Compare" button and after that you can save your result in a text file. Description: Turned out you made a mistake, you have or you had or you will have to pay your opponent and you have no clue who he/she is! Pay Off Poker Calculator is a fun and easy to use application that can be used as a safe and free way to calculate the correct number of credits to ask from the player. The application allows you to enter the number of players, the card suit and the number of value and the pot to make a bet. Then click on 'Deal' and all is done! The result will be displayed in a user friendly interface and

includes the pot, player's and your winnings. Book Reviewer Make good use of the book review application that allows you to compare books, review one and recommend it to your friends! You can enter the book review title, author and the rating you think of each book. You can also choose whether to search for a similar book or not and if so, to display the similar book reviews too. This free app is simple and easy to use. You just need to enter the book title and then the application will do the rest! Description: Take a look at the options we have added in version 1.0.0, including the application's ability to search for movies, books, shows, and, now, music! We have added a 'Similar artists' option which helps find similar artists for the music that you already have on your device. You can also check out the recommended artists, albums and songs of your own favourites. Description: The MCM Hold'em Calculator and Analyzer is a great app. It provides us with a quick way to analyze the Hold'em poker

System Requirements:

1. 2GB RAM, 4GB of RAM recommended
