It can help you find an appropriate name for babies, or you can just look for your friends' names to see what they mean. The program is packed in a dull and uncomplicated interface where a complete list of the names is

automatically displayed upon app initialization. This list shows the meaning and origin of each name; you can sort items according to the name, meaning or origin. Additional features of HippoGame allow you to mark favorite names, use a search function, display only names with a particular initial, as well as pick the data refreshing mode between automatic and manual. The straightforward application puts little strain on the computer, as it uses a very low amount of CPU and system memory. It has a good response time and quickly displays results with names. We have not come across any issues during our evaluation; HippoGame did not freeze, crash or pop 2edc1e01e8

HIPPO has become a popular application for quickly finding names by country, area, and language, as well as by a variety of other methods. System Requirements: - Windows 98, 2000, XP About Hippo Software Founded in 1995 by Anna and Dmitry Kiselev, Hippo Software develops and publishes a number of software tools for working with databases and working with files. Hippo Software ( is the leading developer of database 'softwares', which was originally based on their professional database 'HippoSoft'. With time the company have been expanding their portfolio. Most notable in this regard is HippoSoft for Palm OS, HippoSoft OpenOffice extension, HippoSoft Text, HippoSoft Designer, and HippoSoft MediaStudio. The company also develops database software: HippoDatabase Server, HippoTools, HippoProject, HippoShell. HippoSoft offers a support service of 24-hours support for its software products. HippoSoft allows to create a lot of software tools and database applications for a wide range of purposes. It might not be a bad idea to do all of your pre-registration between 2-4 weeks in advance. My PSB website crashed once and I had to try and pre-register but I just got to the point where the website was still hanging and I
